

MEMBERSHIP/REGISTRATION COMMITTEE

The biggest change to this committee over the last few years has been the introduction of online registration. This initiative was led by Robin Modesto and was necessary due to the COVID-19 pandemic that started in March 2020.

There are two distinct sections to registering online. One is for active members and anglers (non-members) which requires a payment. Payment for wharf fees and club donations are also available with this option. The second option is for junior and life members which doesn't require a payment. The Club encourages registration for the junior and life members to assist us in record keeping and maintaining accurate contact information.

If registering online isn't an option, registration at the clubhouse is also available.

If registration hasn't occurred for the angler or club member before fishing their first tide of the season, an "intent to register" can be communicated to a director. Another option is to sign up on the sheet at the clubhouse that is used for intent to register. Registration should happen after the fishing trip has ended. If late at night, the next morning is fine.

One day registration is not available online and must be done at the clubhouse.

A reminder to all those fishing that a tidal sports fishing license is required and must be filled out correctly before a fish is weighed at the clubhouse.
