

Hello Anglers

There are a few changes to report for this season regarding the Tyee Club Wharf. First there is an updated Wharf Tenancy Policy posted on the Tyee club Website under Communication/Committees/Wharf. This along with the Waitlist and Moorage List will be kept updated and available both on this site and at the Clubhouse.

The second notable change is after a long tenure the Seaplane and fuel infrastructure has now been removed from the site this season by Sealand Aviation. This has created 3 extra moorage spaces for moorage for 2023 as well as opening space and visibility in the parking lot.

Thank you to all volunteers with pre-season work, clearing and trimming back weeds and scotch broom, re-siding and painting the shed at the top of the ramp. And helping complete all the tasks that have the lot and dock ready for the season.

Future work to the dock for the offseason this year will be addressing the rusting out panels on the existing slide ramps. As well we will be pursuing the addition of moorage by installing more slide-ramp spaces at the southwest end of the dock where the plane was previously located.

Good luck on the water this season,

Darrell Knowles

Wharf Manager
