

Hello Anglers

Welcome to the 2024 Tyee Season.

The Tyee Club Wharf 2024 moorage map and waitlist are available both on this site and kept by the weighmaster at the Clubhouse.

This spring Dennis Bellavance and the crew at Rock Bay Enterprises completed extensive maintenance work on the dock removing and replacing deteriorated rusty panels at the bottom sections of the slide ramps with sections of new fiber grating. This product should prove to be a durable and effective surface that improves walking safety and traction along the edge of the dock. The crew also replaced galvanized flat steel to compromised surface areas. Tracks have been installed to support and guide the ramp wheels as it moves back and forth through tide changes. The Rock Bay crew did a fantastic job on this work that will improve the safety and life of the dock.

Thanks again this year to the volunteers who do the pre-season work, clearing and trimming back weeds and scotch broom in the parking lot and waterfront, and all the tasks ahead of the season that have the lot and dock ready for fishing.

For the future planning, we will continue looking at adding additional moorage stalls or slide-ramp spaces at the southwest end of the dock where the plane was previously located.

Tohanks for the help and good luck this season.

Darrell Knowles

Wharf Manager
